Type of activity:

Inner Development Goals

Short description:

Inner Development Goals (IDGs) is a blueprint of the capabilities, qualities and skills we need in order to achieve the 17 Sustainable Development Goals (SDGs). It aims to educate, inspire and empower people to be a positive force for change in society and find a more purposeful way to look at our lives and the lives of the people around us. It is a global initiative that develops inner abilities, skills and other qualities for people and organisations involved in efforts to contribute to a more sustainable global society. The IDGs will provide an essential framework of transformative skills for sustainable development, a field-kit (in co-creation now) on how to develop these necessary skills - open source and free for all to use. The current IDGs framework represents 5 dimensions and 23 skills and qualities which are especially crucial for leaders who address SDGs, but fundamentally for all of us! It is the greatest possible accelerator to reach the Sustainable Development Goals and create a prosperous future for all humanity.
